

RG-TCC-01S

Ranger Drop Box Card Collector

RANGER
AUTOMATION • REVOLUTION

Ranger Drop Box Card Collector is a ideal solution for your crowded control. User can drop their visitor card into the dropbox to gain access for exit or entry. This model can be integrated with any access control reader or turnstile.

RG-TCC-01S design is simplified to achieve highly affordable solution for ticketing and visitor management system. Using the card box, the visitor just drop the card into the slot, the reader inside read the card number and the controller will trigger the turnstile to open. The card box will make the whole process automatic, and save the human resources cost for the application.

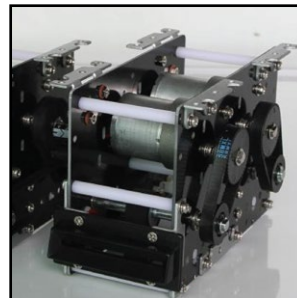

Integrated with any VMS/Access Control

Any brand access control reader can be installed inside the dropbox.

Flexible Card Size

Flexible card size with different thickness.

Reliability

The card collector core ensures smooth and proper operation of the drop box card collector.

Practical

The manual release is easy, intuitive and protected by a personal key.
